All results have taken into account that some participants took the wrong turn on the run; by far and large, this has made no difference in the standings because either all the top finishers took the wrong turn, or the times were far enough apart that it would not matter. Because no one could determine the time difference (we estimated perhaps 30-40 seconds round trip since it was a short sprint to the road at the Rec and a little longer to the bike path where the run normally met the street)---again, this appeared to not make any difference as stated above. *Female age 26 thru 35 3rd and Female age 36 thru 45 are a virtual tie, due to one entrant taking the wrong run which would have reduced her time somewhat—we will give medals to both for this reason. All others stand as above.

When you pull up the raw data you will perhaps have some questions----we had several entrants substituting for others but did not have time to make the changes on Race Day, especially with the problems we were having with the computers---these included a few females for males in different age categories due to swim time compatibility. Those whose changes were affected know where to find their times---the places above obviously take into account these substitutions. If you have a question, call me.

Again, these are the results from all our number analyses. You will have to calculate your own split times---some data there is missing, but very little, so please deal with it as best you can. At this point we feel like we've been rode hard and put away wet !

Over the next week we will be contacting you (or if you will call me at 801-791-3929 or email me at jtjky13@gmail.com) we will make arrangements to get your medals to you. We apologize that we could not hold the medals' ceremony—we regret all the errors and problems we have encountered along the way, but we hope you enjoyed the event. We enjoyed hosting you and wish you the best in your pursuit of physical fitness !!
